PLC_NAME	Waterbody	Currently in Appendix B	Location	ADEQ evaluation	Comments
USDA FS - APACHE SITGREAVES NF - BLACK MESA RANGER DISTRICT	Unnamed trib to Oklahoma Flat draw	Yes	34°23'35", 110°33'36"	Not WOTUS	Outfall is to unnamed trib that ends 200' north of Hwy 260. There is no channel connecting the unnamed trib to Oklahoma Flat Draw. Indistinct/disconnected.
CITY OF KINGMAN - HILLTOP WWTP	Frees Wash	No	35.318239, - 113.953411	Not WOTUS	trib to Truxton Wash & Red Lake, a terminal playa. COE JD on Truxton Wash- not WOTUS.
					Infrequent discharger. This unnamed wash is traceable to the CAP canal, where its channel indicators are interrupted. There is ponding upstream, but little channel indicators downstream, however topo maps show a channel present. A faint channel can be traced to a residential development at approx. S. Mountain Rd & Ray Rd where the channel is lost for approx. 0.33mi, then there are floodway indicators downstream to Ellsworth Rd where the channel appears to disappear into underground stormwater pipes. There is a floodway running from Williams AFB to the East Maricopa Floodway, but the channel structures drain just the airport and do not appear to connect to the Unnamed wash. Evaluation is Not WOTUS.
GOLD CANYON SEWER CO - WWTP	Unnamed wash, trib to Queen Creek	No	33.364573, - 111.474037	Not WOTUS	
RED ROCK UTILITIES, LLC	Unnamed trib to Santa Cruz river	No	32.572472, - 111.344156	Not WOTUS	Wash runs into ag canals near Eloy and disappears
VERRADO WATER RECLAMATION FACILITY	Unnamed wash, eventual tributary to Gila River	No	33.468362, - 112.498722	Not WOTUS	The Verrado discharge at a golf course runs into a wash, channelized along the border of the development, flows into a detention pond, underneath a highway and then deadends at a large flood retention basin, not traceable to either the Roosevelt irrigation district canal or the Gila River. Not WOTUS.
